

*Smart Growth:  
Building our future, preserving our landscape.*

Cimarron ranges across rolling foothills on the western slopes of the majestic Franklin Mountains. It is a mixed-use, master-planned community, based on Smart Growth principles. It is the first true master-planned community of its kind in El Paso.

Cimarron will feature neighborhood parks, walking trails, bike lanes, landscaped roadways, schools, preserved arroyos, and clear views of the Franklin Mountains, the Upper Valley, and magnificent high-desert sunsets. It is a community in harmony with the environment, yet only minutes from major shopping centers, hospitals, and entertainment.

The neighborhoods represent forward thinking in residential design, where the existing environment is protected as much as possible, where gracious living includes the beauty and tranquility of open spaces. Cimarron is a new definition of home, and it's waiting for you now.
